

PASSWORD SECURITY CHECKLIST

Simple ways to keep your logins secure

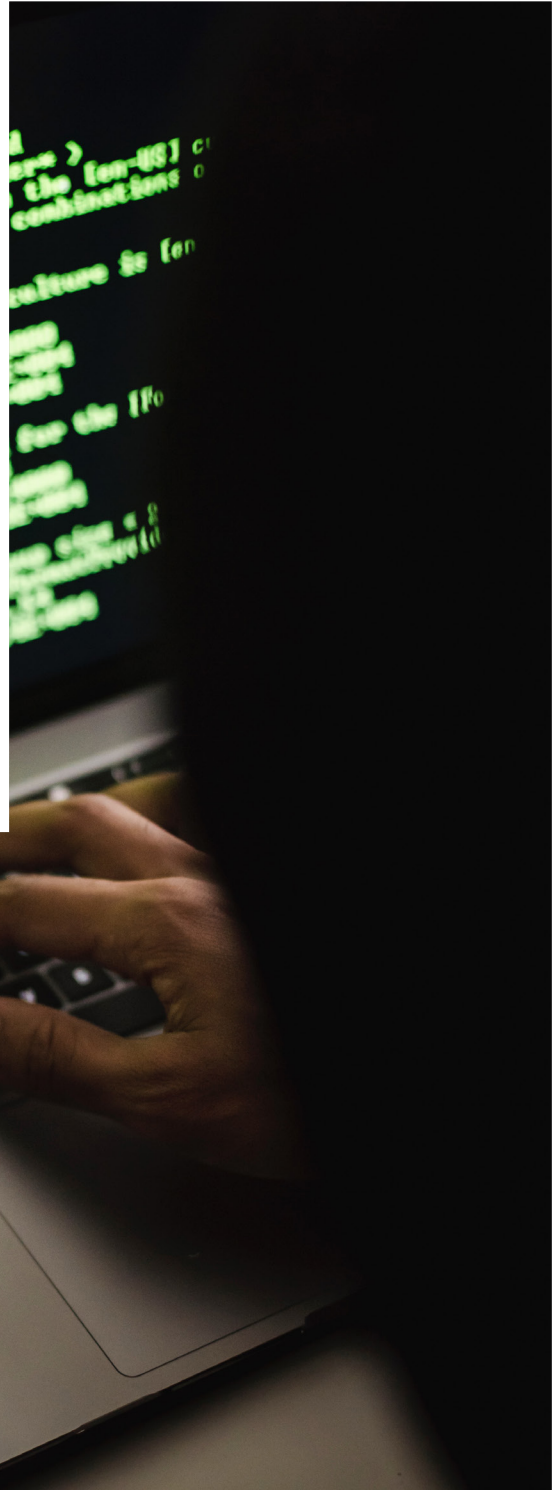

[firstchoicefcu.com](https://www.firstchoicefcu.com)

ABOUT THIS CHECKLIST

Passwords are EVERYWHERE. You need a password to log into your bank account. You need a password for Facebook. You need a password for your email accounts.

Your passwords and logins protect all of your information, both personal and financial.

You can use this checklist to make sure your password security is healthy and actually “secure”.

PASSWORD SECURITY CHECKLIST

Protect Your Information

- Use at least 12 characters, without being “English” readable.
- Use a mixture of uppercase, lowercase, numbers and special characters.
- Don’t use personal information (birthdates, addresses, etc).
- Use unique passwords for every account.
- Never share passwords with others.
- Use a “password manager” to save and generate good passwords.
- Avoid saving passwords in browsers and apps.
- Enable 2FA whenever possible.
- Avoid any login while using a “public internet source” like public WiFi.

THANK

YOU
